

Paragon Strip Cutter Machine

- PS-2013 Computerized Fully-Automatic Strip Cutter .
- Technical Parameter .
- Band Width: From 5mm to 1680mm
- Maximum Operation Width :2200mm
- Output each Workday : 2000m-6000m(10mm-35mm)
- Maximum roll diameter :280mm
- Blade diameter :400mm
- Power :220v/380v,singale /three phase
- Machine diameter (L x W x H):2800x1250x1400mm
- Microcomputer programmed data input ,visual interface
- for operation and easy & comfortable strip-up
- Programmed data control ,step motor drive ,accurate Size
- for the need s, Five different Size of Cutting on the same cloth beam ;once the machine is started ,if can complete cutting once in a time
- Magic eye for the monitoring of cutting ,electronically-tuned Cutting rate ,electronic Transduction for the principal axis of cutter
- Magic eye for the monitoring ,manual or automatic knife sharpener and sharpener ;the time for pause can be set and the sharpener can work simultaneously .
- Chinese & English Operating interface ,which is suitable for many language .it is simple and understandable for ordinary
